1: Gayton E-5 (1925-1930) 1948 N529 Yokuts N529
[P. 147 a] Choinimni

Both sexes wore the hair long, banged across the forehead by women, parted in the middle and held back with eagle-down cord by men. Women tattooed their chins, and a few wore a bone through the nasal septum; both sexes had pierced ears. Men plucked beard hairs with split-twig tweezers. The hair was brushed with a soaproot brush which had curved tips on its bristles. White paint put on over red paint was used ornamentally.[8]

A hairnet served as the foundation for feather head ornaments, the usual ču and sema, but it was also used by any man who wanted his hair held compactly for practical purposes. P.D.W.'s net, made of grocery string, is now University of California Museum specimen no. 1-27001. The method of putting on the net is as described for the Central Foothill region and shown in figure 7, Part I.

MISCELLANEOUS DATA

Means of transport.--As with all Yokuts dwelling upon the lakes, sloughs, rivers, and creeks of the San Joaquin Valley, the Choinimni were expert swimmers. Infants were immersed in icy waters before they were able to walk and learned to swim from that time. A swimmer in the San Joaquin used "a long overhand stroke."[9]

The Choinimni at Sycamore Creek made small tule rafts for use on the river near their village; these carried one or two persons.

The large barges of tule, made for the journey to Tulare Lake, were constructed in sloughs about ten miles downriver from Sycamore Creek. These were 50 feet long, of three long separate bundles bound with willow withes; the two outer ones were raised slightly as a sort of bulwark above the level of the center bundle. Each end of the boat was pulled up 2 to 3 feet higher than the deck. Along the center was piled all the equipment, which "included mortars and pestles, baskets of acorns, acorn bread, seeds, meat, skins for bedding and many other things." Eight to ten persons, usually of one or two families, sat along the sides while four men stood and poled, though this was mainly for guidance as the river current carried the craft. The return trip was made toward summer while the river was still high enough so the boats could be poled upstream to the original point of departure. From there the dunnage was carried afoot up to the village at Sycamore Creek.[10]

According to Jeff Mayfield, the carrying net of milkweed twine was used to support the conical burden basket on the back, though it is implied that this was done only with an excessively heavy load, such as acorns. Occasion-
